The screenshot shows a modal dialog box for LTX Studio. On the left is the LTX Studio logo. The main content area contains a scrollable list of privacy principles: 'harmful or defamatory content that could harm reputations.', 'Respect for Privacy: You must respect the privacy of others. This involves not sharing personal information without consent and not collecting or harvesting any data from LTX Studio that might violate privacy or data protection laws.', 'Inclusivity: Discrimination has no place here. We stand for a community where everyone is welcome, regardless of race, gender, orientation, religion, or nationality.', and 'Legal Compliance: Abide by the law. Using our services legally is non-negotiable for community safety and integrity.' Below this is the 'Your Privacy Preference' section, which explains that LTX Studio uses AI technology to create and store Face Models and Voice Models based on user content, and that these models may be deemed 'biometric identifiers'. It states that using these services is optional and can be avoided by not uploading content. A checkbox labeled 'Accept the Privacy Preference' is checked. Below this is a link to the 'Privacy Policy - Table A'. At the bottom, there are two more checkboxes: '*Accept our Privacy Preference' (checked) and '*Accept and acknowledge our Terms of Use and Privacy Policy, and uphold the standard of responsibility use as outlined' (checked). A blue 'Accept' button is at the bottom right.

harmful or defamatory content that could harm reputations.

- **Respect for Privacy:** You must respect the privacy of others. This involves not sharing personal information without consent and not collecting or harvesting any data from LTX Studio that might violate privacy or data protection laws.
- **Inclusivity:** Discrimination has no place here. We stand for a community where everyone is welcome, regardless of race, gender, orientation, religion, or nationality.
- **Legal Compliance:** Abide by the law. Using our services legally is non-negotiable for community safety and integrity.

Your Privacy Preference

We are excited to offer you services that allow you to create and edit images, videos, and voice recordings using artificial intelligence ("AI") technology. To do this, we create and store Face Models and Voice Models (as defined in our Privacy Policy) based on your content. Face and Voice Models may be deemed "biometric identifiers" according to the laws of your jurisdiction, but will not be used to identify you or any individual.

Your use of services that utilize Face Models or Voice Models is optional and can be avoided by not uploading images, videos, or voice recordings. By checking the box below labeled "Accept the Privacy Preference" you agree to the creation, collection, storage, and use of Face Models and Voice Models in connection with your use of these services as explained in our [Privacy Policy - Table A](#), which further details our retention policies and your rights.
